

Language Takes Us Everywhere

Fast ForWord®

Technology made easy

Fast ForWord® Open House

Thursday, April 22, 2010

7:00—9:00 PM

Fast ForWord® is a state-of-the-art CD-ROM/Internet based training program. It is a revolutionary way for building language learning skills including student's ability to listen, speak and read.

Based on years of research on language learning disabilities, Fast ForWord® is the first scientifically proven method to teach language skills to children who did not learn it naturally. The Fast ForWord® program focuses on how the brain learns and how the environment stimulates it. Test results have demonstrated, on average, children make language gains of 1 1/2 to 2 years in the 4 to 8 week program.

On April 22 come and try the program for yourself. Information on our summer program will be available. This is a meeting for parents and professionals. No children please.

For the past 8 summers, local students have participated in this comprehensive language-training program at the **TECHConnection** with professionals who have been trained and certified. Fast ForWord® is only available for students ages 6 and up.

No Cost!

***Please fill out and return a registration form
or call to reserve your space. Space is limited!***
